

NAME

hunzip – decompress and decrypt hzip files to the standard output

SYNOPSIS

hunzip [-h] file.hz [password]

DESCRIPTION

Hunzip is the decompression and decryption program of hzip format.

OPTIONS

-h Display short help description.

EXAMPLE

hunzip file.hz >file

NOTES

Redirection of the standard output results platform-specific line terminating, so a compressed hzip file with new line terminators would be bigger with the extra CR characters of the decompression on Windows platforms.

SEE ALSO

hunzip (1), hunspell(1)
