Outline

1 Introduction

- Background
- State of Art

2 Preliminary Results

- Theoretical (Volume expansion)
- Experimental (Change of index of refraction)

Chalcogen elements

Short-range order

- ▶ medium-range order.

Light induced phenomena

Application

The problem we're facing

What others do about it

What's the solution from our group

Spin coating difference

Dipole interaction mode

Setup of the laser

SEM image of As₂ S₃

Theorem (Org mode increases productivity)

- ▶ *org mode means not having to remember \LaTeX commands.*
- ▶ *it is based on ascii text which is inherently portable.*
- ▶ *Emacs!*

Volume gratings

Hologram

Creating structure by light

Confirming defeats

Craig

- ▶ Here's the problem we're dealing with.
- ▶ Here how others
